

Fourth Dimension **Technology**

Company Profile

Pixel Mall is one of the leading institutions in providing solutions for the design and development of Web sites, smart phone applications, branding and and ERP systems. With experience of more than 10 years.

About our company

We are a web design, mobile application and ERP Solution development company in constant growth. We adapt our technology to the latest trends, maintaining a standard of quality and user experience for our customers.

We understand . we care
We never stop *thinking*

"Pixel Mall" is the trade name and registered trademark of the Fourth Dimension Technology Corporation LLC, which is specialized in website solutions and print designs. The institution is licensed by the Ministry of Commerce and Industry in the Sultanate of Oman and holds Commercial Registration No. (1060577).

We started in 2008, we are a web, applications and software solutions company located in the Sultanate of Oman, Muscat. With more than 10 years of experience, we design and develop inspiring and unique solutions to suit corporate goals

Pixel Mall dedicated to providing web, applications and software solutions to its clients that are tailored keeping the business objectives in mind.

With teams dedicated to exploiting the technologies to come up with software solutions that reflect the future. We have developers who are well-versed in various computer languages like Java, Laravel, Ruby, PHP, etc. which makes it really easy for them to come up with creative solutions that meet your business needs.

Mision & Vision

Our mission is to help enterprises accelerate adoption of new technologies, untangle complex issues that always emerge during digital evolution, and orchestrate ongoing innovation. Whether it is a consumer-oriented app or a transformative enterprise-class solution, the company leads the process from ideation and concept to delivery, and provides ongoing support through its framework.

Software Developers

we can help you tackle any technology challenge. Our custom software developers have expertise in most emerging technologies.

Web Developers

Our streamlined development process and experience allow us to deliver top-of-the-line web development services that tick all the boxes.

App Developers

From the discovery phase to creating a mobile app to launching it on the market, we provide full-cycle mobile app development to fit your business domain and budget requirements.

 Transforming the Customer Experience is a new and powerful shift for the Insurance domain that can bring about quantum change. Implementation of customer experience requires transforming traditional strategies, workflows, processes, and technologies.

Modernize existing systems to meet rising customer demands for convenience and experience. Digitization enables insurers to manage Big Data and enhance claims handling mechanisms with the help of new data management infrastructure and machines.

Working Process

Pixel Mall finds the most effective solutions for business needs with a research-driven approach. We pay attention to every step of the web app design process and create products that solve real business problems.

All our projects go through a research-based process

We believe that successful projects are born at the intersection of business goals and user needs. We stick to a research-driven approach to satisfy the needs of your business and the expectations of your users. This approach allows us to create web app designs that solve particular business problems and provide intuitive user experiences that engage users.

We do everything you need in one place. We offer technical guidance, web development services, and infrastructure management to cover the whole process of product development. Our core technology allows us to produce high-performance, secure, and reliable apps.

Why Choose US

We are a web & app development company that turns your ideas into a new driving force of your business. We got brilliant web and mobile app developers to deliver projects on time and maintain the top-notch code standards.

Business Experience

Pixel Mall has over 10 years of experience in offering professional web, Apps, and software solutions in Oman and other countries. We have successfully achieved a huge selection of projects of different sizes and difficulties in several business and technology domains.

Comitment to Quality

While retaining competitive rates, we never compromise our solutions' high quality. A dedicated quality assurance department tracks project activities at all development levels, and guarantees defect prevention, project risk mitigation, and high-quality outcomes.

Delivering business Value

Delivering exceptional business value to customers is the primary objective at Pixel Mall. This way, we can provide our customer's technology solutions that add real value to their business. It's simple – we realize that our customers' success measures our success.

We are a full-service digital consultancy that partners with your enterprise to inspire possibility. Working with your business to break new ground, together.

Our Services

App Development

Working closely with our Project Managers, our app developers can create mobile apps for Android, iPhone, and iPad devices that will reflect your app development needs. Our Project Managers are involved in this process with you from beginning to end, and they are deeply invested in the projects we work on with you. We care about the apps just as much as if they were our own. We'll make sure that the final product suits your needs!

IOS

Our iOS app development services include full-cycle development, and we are ready to support you from the very ideation to App Store upload. Our expert-level staff provides consulting support throughout all the development process. We are able to render iOS development services by using all the latest iOS features to our apps.

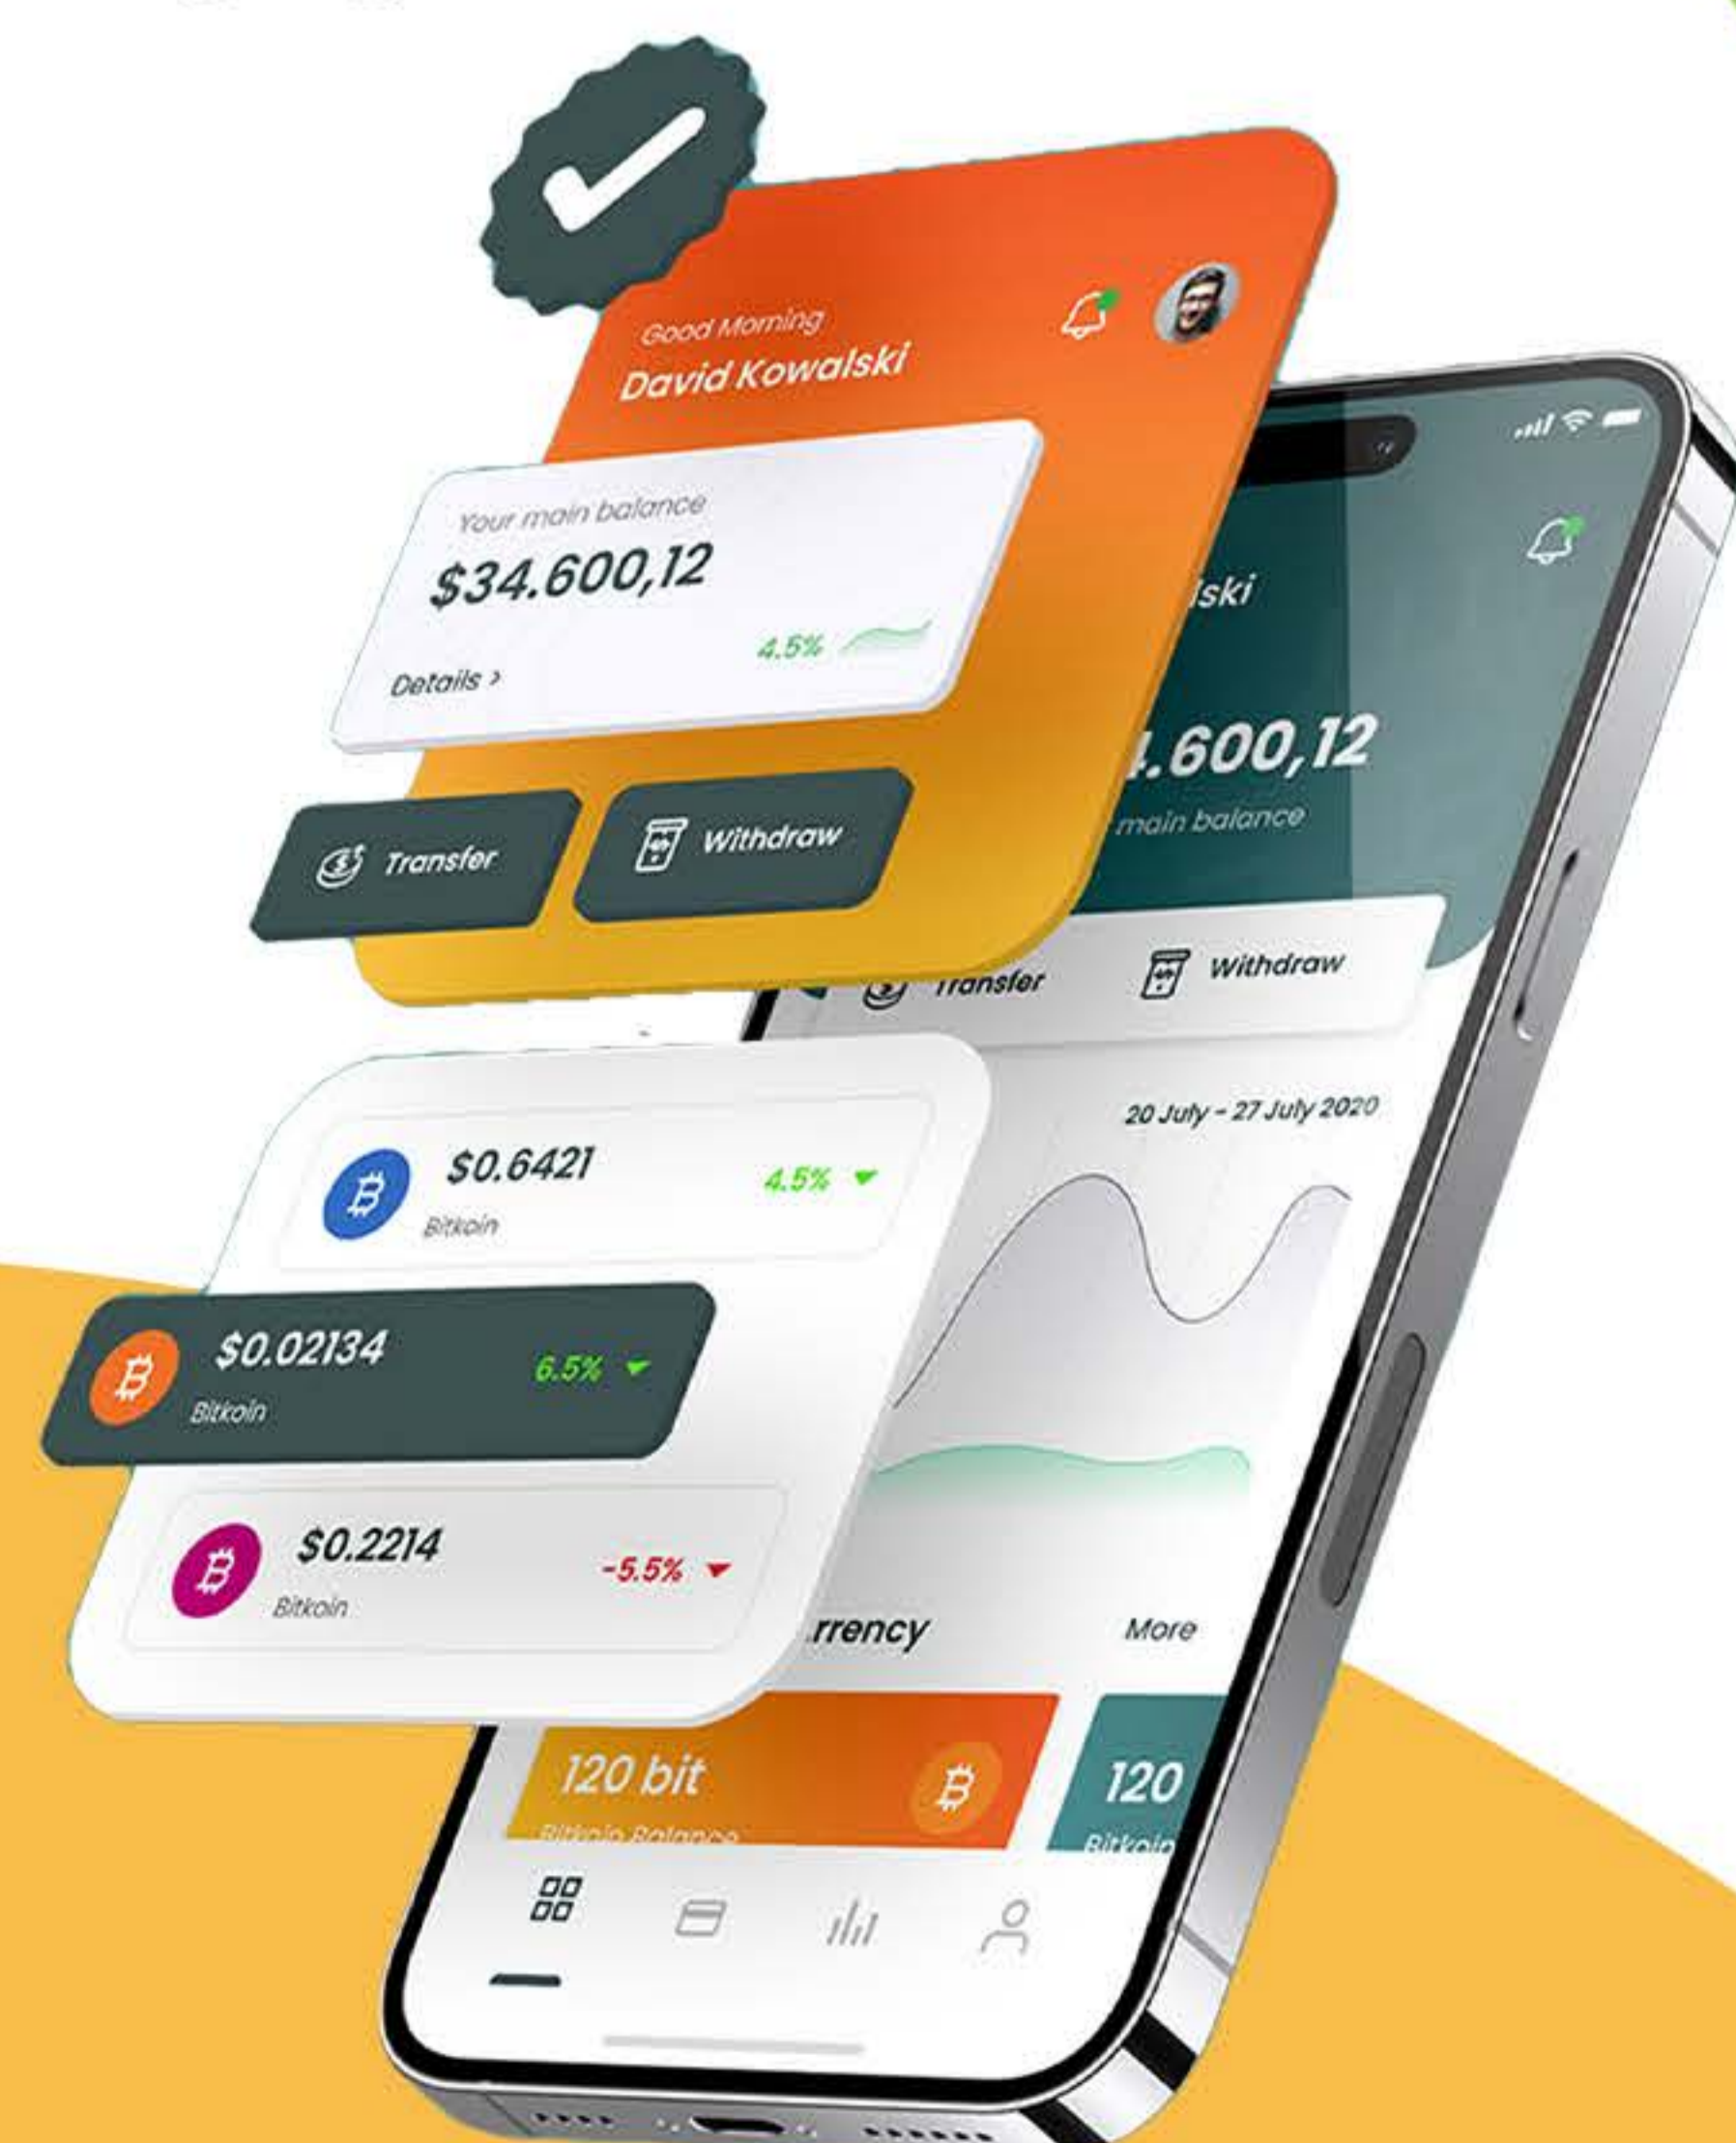

Cross Platform

For cross-platform development we also apply React Native. This JavaScript framework uses standard native UI blocks. The use of the fundamental standard UI blocks, like regular iOS and Android applications, familiar to the users from other native applications, so it facilitates user interaction with the application.

Andriod

Our mobile software development company's Android developers team builds advanced Android apps via using Java and Kotlin languages to gain brilliant app performance and appearance for Android devices. Our software developers consider best combinations of languages and tool to produce highly-qualitative apps.
